PROFILE

MERN stack developer skilled in JavaScript, React, TypeScript, Zod, Node.js, and Fastify, currently working at ProCode Platform, building secure web applications for Caserover, an AI-powered legal platform. Aspiring cybersecurity specialist focused on innovation, data integrity, and secure solutions.

EXPERIENCE

PROCEDURE PLATFORM • MARCH 2025-PRESENT

EASTGATE MALL • HARARE, ZIMBABWE

CaseRover - <https://caserover.co.zw/ai/>, Contributing to responsive, user-friendly interfaces using React, TypeScript, and Zod.

Collaborating with backend teams to ensure seamless integration, strong form validation, and an intuitive user experience.

PERSONAL-PROJECTS

Dimbop – User Site & Admin Dashboard

User Site: <https://dimbop-users-site.vercel.app>

Built with React and Tailwind CSS to deliver a clean, responsive interface.

Admin D: <https://dimbop-digital-marketing-dashboard.vercel.app/>

Built with React, Tailwind CSS, and TypeScript. Used React hooks and state management like userStore to handle admin data efficiently, reducing repetitive code and improving maintainability.

Backend in progress : Developed using Node.js, TypeScript, Fastify, Zod, Bcrypt, and PostgreSQL for secure and scalable data handling.

Ominiview - <https://ominiview.netlify.app>, Built a responsive UI with React and CSS to showcase services. Focused on user experience and accessibility. Backend implementation is in progress.

Speedbikes - <https://speedbikes.netlify.app>, Self-Initiated Project MERN stack project (Oct–Nov 2024). Developed features for bike booking, reviews, and cart management with a responsive frontend using React and CSS.

UNCOMMON.ORG • FEB 2024 – NOV 2024

Coding Instructor - Taught Scratch programming to over 800 students, enhancing their technical skills and problem-solving abilities through game development. Created an engaging learning environment that inspired students to build interactive games and develop strong computational thinking skills.
